

EB0010 EB0020

DETECTOR BASES FOR IRIS AND ENEA DETECTORS

EB0010

Standard bases for the electrical connections of IRIS and ENEA detectors on closed-loop lines (max. 240 ENEA detectors per line) or conventional lines (max. 32 IRIS detectors). Complete with power supply and alarm contacts. Equipped with short-circuit plate which ensures continuity in the event of removal of the detector from the line.

EB0020

Relay base with programmable relay base (contact NC and NO) controlled directly by the detector microprocessor. If combined with Enea series detectors, the activation logic can be defined independently for each relay base through the Inim programming software. The EB0020 base can be used to connect IRIS detectors to an intrusion control panel.

Technical specifications

Base model	EB0010	EB0020
Contact type		Sliding contact
Fitting method		Bayonet coupling
Colour		White
Enclosure material		Polycarbonate
Supply voltage	/	from 10 to 30V $\overline{\text{ac}}$
Relay	/	1A 30V $\overline{\text{ac}}$
Operating temperature	/	from -10 to +55 °C
Dimensions	Ø 110mm h 24mm	
Weight	15g
